ST. PETER CHAPELS IS NOW SERVING DAVAO CITY!

St. Peter Chapels – Davao City was officially opened last March 19, 2009. Attended by the officers and employees of the St. Peter Group of Companies, the event was also graced with the presence of Honorable Vice Mayor Sara Duterte, who stood on behalf of her father, Honorable Mayor Rodrigo T. Duterte of Davao City.

The celebration started with a motorcade around the city with the On Any Sunday Riders Club (the bikers club of Mayor Duterte) as frontrunners. It was followed by a Thanksgiving Mass and Chapel Blessing officiated by Rev. Fr. Sixto Vistal. DJ Skipo Jack (a well-known local broadcaster) hosted the Dinner and Evening Party with the beautiful Ms. Gerardinn Marie Angeles-Duran (Davao City Branch Marketing Supervisor) as co-emcee.

Famous Cebuano novelty artist, Maximo Surban, was the night's special guest gathering an eager crowd alongside the road. Upcoming young singer, Kirk Jude Sagrado, and local Bossa Nova band, Jazz Frenz, also performed a mix of classic and modern hits to the delight of the audience.

A press conference was held the day before the formal opening and was participated in by more or less 25 members of Davao City Media. A panel of St. Peter Group Officers headed by Executive Vice-President for VisMin Operations, Mr. Victor Jose Tancinco, and Executive Vice-President for Luzon Operations / Marketing and Business Development, Dr. Mildred Vitangcol, generously answered questions relevant to the chapel opening. The sensational pink "kabaong" (custom-made pink casket) highlighted the activity as guests, St. Peterians and chapel clients alike queued for a souvenir photo with gusto and excitement.

St. Peter Chapels – Davao City features an expansive two-storey building with eleven (11) spacious and elegant viewing rooms all installed with the St. Peter E-buro. It also offers quality cremation services through its new Crematorium equipped with the latest, state-of-the-art, efficient and environment-friendly cremation machines sourced from the world renowned leader in cremation technology based in the U.S.A.
